About

Hi, I'm Adam.

I'm a Ruby on Rails developer living in Santa Fe, New Mexico and I've been working remotely for around 4 years. I love to create amazingly useful web applications that help businesses collect, understand, and display vital data. I enjoy writing clear, clean, and tested code that I can be proud of. I value honesty, humility, and humor and I'm looking for a long-term career with a company with these same qualities.

Work experience

Ruby on Rails Developer   11/2015 – present
Bicycle Technologies International, Santa Fe, NM

Developed and maintained a B2B e-commerce application developed in Ruby on Rails. Developed and maintained business analytically tools used for purchasing, sales forecasting, lead development, and product sustainability. Database management using MS SqlServer. Managed E-commerce relationships and seamless data sharing across various web interfaces allowing real time inventory for B2C websites. Fostered business technology relationships bridging the technology and business gap ensuring communication across departments.

Freelance Ruby on Rails Developer   11/2015 – present
SouthWestern College, Santa Fe, NM

Full-stack software development in Ruby on Rails. Migrated legacy student record/grading application to a cloud platform on Heroku. Upgraded application's Rails and Ruby versions as well as incremental feature builds and deployments.

Ruby on Rails Developer   07/2014 – 11/2015
JackRabbit Systems, Santa Fe, NM

Application development using Ruby on Rails for an international software development company specializing in facilitating direct online booking solutions for the travel and tourism industries. Management software that allows lodging properties to easily compete with online travel agencies by setting budgets and bidding within top metasearch engines.

Junior Ruby on Rails Developer   08/2012 – 06/2014
Bicycle Technologies International, Santa Fe, NM

Software development using Ruby on Rails.

Worked on upgrading legacy B2B e-commerce application from Rails 2.2 to 3.2.
